PLEASE READ >>> Central Contractor Registration (CCR) is MANDATORY for all solicitations to be awarded for goods and services provided to the Department of Defense. Lack of registration in the CCR database will make an offeror INELIGIBLE for award.
COMING SOON SSL (Secure Socket Layer) and PKI (Public Key Infrastructure) - Army policy requires increased security between private industry and the Corps of Engineers. This will require firms to have a web browser that has 128 bit encryption capability. The most current version of major browsers has this capability, and other browsers may be upgraded to 128 bit. There will be no procedural change for access to the Corps' Web page.
